English
Telugu

PROFILE

As a web developer at OctaNet Services Pvt Ltd, I design, develop, and maintain web solutions for various clients and projects, using the latest technologies and best practices. Alongside a team of experienced and talented developers, I create user-friendly, responsive, and secure web applications that meet the needs and expectations of the users and the stakeholders. Some of the technologies and tools I use include Java, Python, HTML, CSS, JavaScript, Bootstrap, and Django.

I am also a BTech student at Vellore Institute of Technology, majoring in Computer and Information Sciences and Support Services. I have a strong foundation in programming languages, frameworks, and tools, as well as object-oriented programming, web development, and data structures and algorithms. I have earned certifications in Java Object-Oriented Programming and Learning Python from LinkedIn, and I have been leading and mentoring a team of students who are interested in computer science and innovation. I am passionate about enhancing the learning and engagement of students and faculty through web development. I am always eager to learn new skills and technologies, and to collaborate with other developers and stakeholders in the field of web development.
